

# GitHub Contribution Guide

## Dairy E-commerce Platform

---

### 1. Branching Workflow (Strict Rules)

#### Important Rules

- Do NOT push directly to the `main` branch.
- Every team member must work on their own branch.
- Only the team lead is allowed to merge changes into `main`.

#### Workflow Diagram

Developer → Create Branch → Make Changes → Commit → Push → Pull Request → Review  
→ Merge to Main

#### Step-by-Step Workflow

```
# Step 1: Clone the repository
git clone https://github.com/Roshan3019/dairy-ecommerce-platform.git

# Step 2: Move into the project folder
cd dairy-ecommerce-platform

# Step 3: Create a new branch
git checkout -b feature/your-feature-name

# Step 4: Make your changes

# Step 5: Add changes
git add .

# Step 6: Commit changes
git commit -m "feat: add login page"

# Step 7: Push your branch
git push origin feature/your-feature-name
```

## 💡 Example

```
git checkout -b feature/login-page
```

## 2. Branch Naming Conventions

### ◆ Format

```
<type>/<short-description>
```

### ◆ Common Prefixes

- `feature/` → New feature
- `bugfix/` → Fixing bugs
- `hotfix/` → Urgent fixes
- `refactor/` → Code improvements
- `docs/` → Documentation updates

## 💡 Examples

- `feature/login-page`
- `feature/product-listing`
- `bugfix/cart-total-error`
- `hotfix/payment-failure`
- `refactor/api-cleanup`
- `docs/readme-update`

## 3. Commit Message Rules

### ◆ Format

```
<type>: <short description>
```

### ◆ Types

- `feat`, `fix`, `docs`, `refactor`, `style`, `test`

## ✅ Good Examples

- `feat: add login page UI`
- `fix: resolve cart total bug`

## ✖ Bad Examples

- update code
- changes

---

## 4. Pull Request (PR) Guide

### PR Workflow Diagram

Push Branch → Open GitHub → Create PR → Review → Changes (if needed) → Merge

#### ♦ Steps to Create PR (GitHub UI)

1. Go to repository on GitHub
2. Click **Compare & pull request**
3. Add title and description
4. Click **Create Pull Request**

### GitHub UI Reference (What You Will See)

- "Compare & pull request" button after push
- PR title field
- Description box
- "Create Pull Request" button

### Example PR

Title: Add login page

Description:

- Created login UI
- Added validation
- Connected API

Notes:

- Check mobile responsiveness

#### ♦ Review Process

- Team lead reviews code
- Changes may be requested
- After approval → merged to main

## Final Notes

```
# Always pull latest changes before working  
git pull origin main
```

- Keep branches updated
- Write clean commits
- Follow naming rules
