

Team Git Workflow Guide (E-commerce Dairy Project)

1. Clone the Repository (First Time Only)

```
git clone https://github.com/your-username/dairy-ecommerce-platform.git
cd dairy-ecommerce-platform
```

2. Create Your Own Branch (First Time Setup)

```
git checkout -b your-name-branch
git push -u origin your-name-branch
```

3. Daily Workflow (Before Starting Work)

```
git checkout main
git pull origin main
git checkout your-name-branch
git merge main
```

4. Add & Commit Your Code

```
git add .
git commit -m "Your meaningful commit message"
```

5. Push Your Code to GitHub

```
git push origin your-name-branch
```

6. Create Pull Request (PR)

Go to GitHub → Compare & Pull Request → Select base: main and compare: your branch → Add title & description → Create PR

7. Code Review & Merge

Team reviews PR → Merge into main → Delete branch (optional)

8. Important Rules

Do NOT push to main. Always use your branch. Pull latest changes before work. Write clear commit messages.

9. Example Workflow

```
git pull origin main
git checkout roshan-branch
git add .
git commit -m "Added cart functionality"
git push origin roshan-branch
```
